The Velox Extend-a-box (Aust. Design #13788/2009) is an innovation in Brick In Letterboxes.

Listening to your requests, we have designed a unique concept that allows the brick layer to utilise the same letter box for any depth of brick or blockwork from 200 to 480mm. This is a huge breakthrough in versatility, one box that will cover blockwork or brickwork.

Extend-a-box is fully assembled, which means no extra work for the builder or handyman. To alter the size, just pull the front and back apart and you have exactly the size you want (200mm to 480mm and anywhere in between). Perfect for that extra bit of depth you might need for a rendered wall.

Extend-a-box is environmentally friendly utilising a diecast aluminium front and extruded plastic body, all made in Australia from recycled materials.

Contact sales@velox.com.au for more information.

Face Measurement 370mm wide x 190mm high
Slot Size 335mm wide x 30mm high
Available in Front or Rear Opening access

"Made in Australia - by Australians - for Australians"
