

Velox Extend-a-box is the perfect choice for any wall installation, brickwork, stone, blockwork, it adapts from a depth of 200mm to a maximum of 480mm by pulling it apart.

Installation Instructions:

1. Build the wall height to the bottom edge of the letterbox (750mm – 1m is **Post Office Preferred**).
2. Place letterbox where it is to be installed.
3. Pull front and back in opposite directions to expand the sleeve up to desired length.

Face Measurement 370mm wide x 190mm high
Slot Size 335mm wide x 30mm high
Available in Front or Rear Opening access

Aust. Design No. 13788/2009

4. Lock sleeve in desired position by pop riveting the plastic sleeve in place or by using a product such as “Liquid Nails” to adhere the front and back face panels to the wall face.
5. We recommend placing a lintel or similar load bearing support above the box prior to bricking over the letterbox to avoid “wall sag”.
6. Boxes can be “buted up” against each other where multiple boxes are required.
